EDUCATION

STI College Meycauayan

BS in Information Technology

Jul 2025 – Jun 2029

Meycauayan, Bulacan

PROJECTS

PRIMA | *Next.js 16, React 19, Tailwind CSS, Google Gemini SDK*

Live | GitHub

- **Developed a Next.js B2B landing page** as a volunteer project, migrating a legacy HTML site to a full **React application** within a **4-day sprint**.
- **Built an AI chatbot** via **Google Gemini SDK**, engineering a **2,100-line React component** to queue API requests and stream real-time **Markdown** responses.
- **Created a custom React hook** (*useDevicePerformance*) leveraging *navigator.deviceMemory* to automatically disable heavy animations and ensure smooth scrolling on older devices.
- **Optimized mobile performance** by profiling Android **GPU bottlenecks** and replacing expensive CSS blurs with **hardware-accelerated mask-image** gradients.

eLMS 2.0 Overhaul | *React 19, Vite 7, Supabase, Dexie.js, Tailwind CSS 4.0*

Live

- **Rebuilt a legacy school portal** into a **Single Page Application (SPA)** with distinct Student, Teacher, and Admin dashboards, utilizing **React Context** for global state.
- **Implemented offline saving** by syncing a **Dexie.js (IndexedDB)** local cache with **Supabase (PostgreSQL)**.
- **Added in-browser document tools**, integrating **Tesseract.js** for local OCR scanning and **Mammoth.js** for Word previews to reduce external API reliance.
- **Secured student data** via client-side **AES-256 encryption** (*crypto-js*) in *sessionStorage* and deployed **Google reCAPTCHA v3** to prevent brute-force logins.
- **Built real-time admin features**, deploying a **WebSocket-based** broadcasting system and *react-virtuoso* data tables to smoothly render thousands of records.

Portfolio — Personal Brand Website | *Next.js 16, TypeScript, Three.js, Vercel AI SDK*

Live

- **Engineered a Next.js 16 portfolio**, writing custom **DOM math scripts** to calculate and **align pixel-perfect, responsive grids**.
- **Built an AI Command Menu (CMDK)** via Vercel Edge Functions, integrating **Streamdown** and **Shiki** to format real-time AI code responses.
- **Developed a 3D particle engine** in **Three.js**, writing **custom WebGL shaders** to offload computations to the **GPU** and maintain **60 FPS**.
- **Created secure API routes** to fetch, cache, and dynamically draw a live **GitHub contribution graph**.
- **Managed complex UI state for drag-and-drop** (*dnd-kit*) and **scroll physics (GSAP)** using **custom React hooks** to prevent re-render lag.

ACHIEVEMENTS

- **Champion, Tagisan ng Talino (2025–2026)**: Crowned Champion at STI College Meycauayan's premier academic and technical skills competition.
- **AI-Augmented Full-Stack Engineering**: Architected three **production-grade web applications** (PRIMA, eLMS 2.0, Portfolio) outside of coursework by synthesizing tutorials, integrating **open-source components**, and leveraging agentic **AI workflows** to accelerate deployment.
- **Advanced Technology Adoption**: Mastered and implemented complex modern architectures (**WebGL, WebSockets, Next.js App Router, IndexedDB**) years ahead of the standard academic curriculum.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, SQL (PostgreSQL)

Frontend Frameworks: React 19, Next.js 16 (App Router, Turbopack), Vite 7, React Router v7

Styling & UI: Tailwind CSS 4.0, Shadcn UI, Radix UI, HeroUI, clsx

Animation & Graphics: Framer Motion 12, GSAP, Three.js, WebGL, React Three Fiber (R3F), Lenis

Backend & Databases: Supabase (PostgreSQL, Edge Functions, Auth), Dexie.js (IndexedDB), REST APIs, WebSockets

AI & Integrations: Vercel AI SDK, Google Gemini SDK, GitHub Graph API, Streamdown, Shiki

Tools & Utilities: Git, GitHub, Google Antigravity, OpenCode, AES-256 Encryption, Tesseract.js (OCR), Mammoth.js, React Virtuoso, dnd-kit, Vercel Analytics
